Ken Mitchell

On Tuesday, November 19, we were honored to have a panel discussion from three (3) very distinguished and talented members of Washington Park Camera Club: Dr. Harvey Cobb, Philip Thomas and Ken Mitchell.

Harvey started off speaking on Composition and the different aspects involved with composing a photograph, Ken followed, going over the points concerning Landscape photography and Philip finished the trio up going

over/defining Street Photography.

Each provided an enlighten lecture which included slides and very helpful hints/insights to capturing that special moment in time through photography.

I believe everyone in attendance left inspired and definitely a little more knowledgeable about one if not all the subjects covered.

Thanks again to our very own - Philip, Harvey and Ken - great job!
